EDUCATION

Post Graduation Diploma in Big Data Analytics | 73.1%

Centre for Development of Advanced Computing, Kharghar | August 2025 – February 2026

Bachelor of Technology in Computer Science and Technology | CGPA 7.3

Amity University Uttar Pradesh, Noida | September 2021 – June 2025

SKILLS AND TOOLS

Languages: Python, R, SQL

Big Data & Workflow: PySpark, Apache Airflow, Hadoop

Data Analysis & Visualization: Pandas, NumPy, Tableau, Excel

Cloud Platforms: AWS (S3, EC2, Lambda, Glue, CloudWatch, SNS, VPC), Azure

Databases: MySQL, PostgreSQL, MongoDB

AI & ML: Machine Learning, Statistics, NLP, LLMs, RAG

Systems & Tools: Linux, Git, Docker, VS Code

WORK EXPERIENCE

BIZINNOVATIV SOFTWARE PVT LTD | Junior Python Developer Intern

August 2024 – September 2024

- Designed and optimized 10+ databases using MySQL and SQL, improving system architecture and data quality.
- Collaborated with the backend team, using Python to enhance database connectivity and support 100+ user transactions.

NEXT24TECH PVT LTD | Python Development Intern

May 2024 – July 2024

- Developed and implemented 5+ GUIs using Tkinter, Python, and MySQL, ensuring user-friendly outcomes.
- Collaborated with the backend team to integrate GUI with database operations, delivering optimized solutions.

PROJECTS

CDAC Kharghar | Final Project – AutoPO – Automated Purchase Order Processing System

Tech Stack: Python, SQL, PostgreSQL, Agentic AI, LLMs (Qwen via Ollama), NLP, PaddleOCR, AWS, Power BI, Docker, Flask

- Built an AI-driven autonomous system to process purchase orders end-to-end with zero manual intervention.
- Implemented real-time event detection and ETL workflows for PO ingestion, validation, classification, and routing.
- Integrated LLM-based decision-making for automated email handling, invoice generation, and inventory updates.

Amity University Noida | Final Year Project – Auto Lane Detection using Auto vision Techniques

Tech Stack: Python, OpenCV, YOLO, CNN, PyTorch, Streamlit, MySQL/PostgreSQL, NumPy

- Developed a real-time lane detection system using computer vision techniques and OpenCV for autonomous navigation.
- Implemented edge detection, perspective transformation, and lane curvature estimation to enhance driving accuracy.
- Trained and tested the model on custom road datasets, achieving high precision in varied lighting and weather conditions.

Inhouse Project | Big Data ETL & Analytics Pipeline (AWS + PySpark)

Tech Stack: Python, PySpark, AWS (S3, Glue, Lambda, CloudWatch, SNS, VPC), Tableau

- Designed and implemented a scalable ETL pipeline to process large-scale structured and semi-structured data.
- Automated data ingestion, transformation, monitoring, and alerting using AWS services and PySpark.
- Enabled analytics and reporting by integrating transformed datasets with Tableau dashboard.

CERTIFICATIONS AND ACHIEVEMENTS

AWS Academy Graduate – Data Engineering: Data pipelines and AWS analytics services

AWS Academy Graduate – Generative AI Foundations: Generative AI and LLM fundamentals

AWS Academy Graduate – Cloud Foundations: Core AWS services and cloud basics

Python Programming Certification – Tutorials Point: Python fundamentals and OOP

CO-CURRICULAR ACTIVITIES

IEEE, Bangalore – Research Paper Presenter, TEECCON-2024 Conference

Amity University, Noida – Class Representative (50+ students, 10+ meetings)

C-DAC Kharghar – Communication Leader

Debangshu Care Club (NGO) – Member, Community Outreach
